

New Program Being Developed: Dementia Caregiver's Companions—Friends For The Journey

January 2022

With funding from the Ann Arbor Area Community Foundation, and in collaboration with EHM Senior Solutions, Dementia Friendly Saline is developing an innovative person-to-person program of ongoing support specifically for caregivers of persons living with dementia.

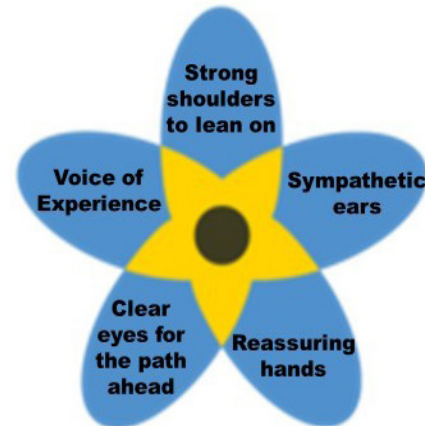

This Dementia Caregivers' Companions program will match well-prepared volunteers with caregivers, especially spouses and other family members who have recently begun the dementia journey with the loved one, and who, like almost all such caregivers, are almost entirely unprepared for their new role.

The Companion will focus on caring for the caregiver, offering strong shoulders to lean on, sympathetic ears, reassuring hands, the voice of experience, and clear eyes to see the path ahead. This unique program will focus on directly providing person-centered help to the caregiver.

Dementia Friendly Saline is currently building the program and seeking volunteers and participants.
